Bogotá, Colombia.

Bilingual software developer with technological background, experience in Java Full Stack and Software Testing. My background includes the integral management of software development through collaborative projects, involving all phases of the software lifecycle, from design and deployment to testing and troubleshooting. I bring a proactive approach to teamwork applying agile methodologies and a strong aptitude for continuous learning, ensuring effective collaboration and adaptability in dynamic environments. My skills make me an outstanding candidate to tackle new challenges and deliver innovative solutions adapted to the needs of the global market.
